## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ito 6863555.

Ito discloses heavy gage plastic socket C having pawl receiving chambers for pawls 12, and an opening with curved (rounded) corners.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ito as applied to claim 2 above, and further in view of Hirschmann 6726495.

Ito substantially discloses the claimed invention except for the pawl receiving chambers having angled receiving walls. Hirschmann discloses angled receiving walls which engage pawls 18.1n, 18.2n, and to form the pawl receiving chambers of Ito with an angle thus would have been obvious, to allow the pullout force to be predetermined.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ito as applied to claim 1 above, and further in view of the admitted prior art (the last paragraph of page 2).

Ito substantially discloses the claimed invention except for positive keyways. The admitted prior art discloses the use of positive keyways, and to provide the socket of Ito with positive keyways thus would have been obvious, to prevent mating with an improper plug.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ito as applied to claim 1 above, and further in view of Miyamoto 6848938.

Ito substantially discloses the claimed invention except for locking legs with anchor pawls. Miyamoto discloses locking legs 32 with anchor pawls 33, and to provide Ito with same thus would have been obvious, to allow mounting to a substrate.

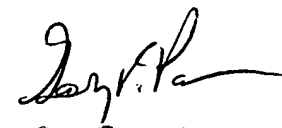

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F. Paumen whose telephone number is 571-272-2013. The examiner can normally be reached on Monday-Thursday.
